

**FOR IMMEDIATE RELEASE**

## **New Right Hemisphere Software Converts SDRC I-DEAS CAD Files for Downstream 3D Publishing**

**COFES — April 14, 2005, Scottsdale, AZ**—Expanding its software portfolio further, Right Hemisphere<sup>®</sup>, a leading provider of enterprise graphics management software, today released its SDRC I-DEAS Module. Available next month, this new software works with Right Hemisphere's core Deep Server<sup>™</sup> enterprise or Deep Exploration<sup>™</sup> client software to transform I-DEAS 3D computer-aided design (CAD) files into lightweight, optimized graphical models ready for use in downstream publishing applications. I-DEAS is a CAD application acquired by UGS from SDRC in 2001 and used today by large manufacturers such as Nissan and Ford Motor Company.

With the SDRC I-DEAS Module added to the Right Hemisphere software suite, users can automatically generate technical illustrations, add interactivity, automatically generate exploded view animations, and create photorealistic images using the original I-DEAS 3D model and export it to a wide variety of 2D formats, 3D formats and publishing environments, including Adobe<sup>®</sup> Acrobat<sup>®</sup> and Microsoft<sup>®</sup> Office<sup>®</sup> applications.

Right Hemisphere's enterprise graphics management software provides support for over 120 different types of 2D and 3D data files. It includes integration with other native CAD formats such as Pro/ENGINEER<sup>®</sup>, CATIA<sup>®</sup>, SolidWorks<sup>®</sup>, and Unigraphics<sup>®</sup>, as well as a range of other medical, scientific, and architecture/engineering/construction (AEC) application formats. With Right Hemisphere's software development kit, customers can also write support for virtually any additional file format they need.

Right Hemisphere's new SDRC I-DEAS Module is available this month. Customers may obtain trial versions or purchase Right Hemisphere software from the company's Web site. To locate a Right Hemisphere reseller in your region, please go to <http://www.righthemisphere.com/store/index.php>

### **Right Hemisphere**

Right Hemisphere delivers an enterprise graphics management system that streamlines the graphics publishing pipeline. This automation accelerates delivery of rich technical publications, interactive training, marketing communications, collaboration documents and other product support offerings. Capital goods manufacturers such as DaimlerChrysler, Lockheed Martin, and Halliburton rapidly implement Right Hemisphere's graphics process automation and graphics data warehousing software to replace manual processes and extend existing CAD/PLM, content management, and publishing software investments. Customers rely on Right Hemisphere's solutions to accelerate time to market of new products and product support offerings, increase revenue from graphically differentiated offerings, and reduce graphics creation costs tenfold.
