FOR IMMEDIATE RELEASE

Right Hemisphere CEO to Address Best Practice Product Graphics Management Solutions at DaratechSUMMIT2006

Fremont, CA — February 17, 2006 — Right Hemisphere®, the leading provider of Product Graphics Management (PGM) software, today announced that its CEO Michael Lynch will speak at the DaratechSUMMIT conference next week on best of breed PGM technologies and processes, and their return on investment. Mr. Lynch's session is 4:00 – 5:30 p.m. on Tuesday, February 21 at the Charles Hotel in Cambridge, Mass. In its 20th year, the DaratechSUMMIT promises to address a range of issues associated with today's global, digitally connected environment such as securing intellectual property; implementing lifecycle process change without disruption; and retaining knowledge and best practices to optimize Product Lifecycle Management strategies.

In a separate session on Monday, February 20 from 4:30 – 5:30 p.m., Right Hemisphere customer Richard Button, a manager of engineering and manufacturing automation at Abbott Laboratories, will present "PLM Implementation Best Practices." He will discuss the implementation of a system that efficiently and cost-effectively publishes 3D product design and associated product manufacturing information (PMI) in PDF without compromising security. He will also address how suppliers understood design intent faster; how they improved component reliability; how manufacturing assembly instructions were developed earlier, and other benefits of the system.

About Right Hemisphere

Right Hemisphere is the leading provider of Product Graphics Management (PGM) software. PGM is a new category of enterprise software that supplies the right product graphics in the right format, right now for technical publications, interactive training, marketing communications, design collaboration, and more across the extended enterprise. Five of the top six automotive OEMs, nine of the top 10 aerospace and defense contractors, and hundreds more customers rely on Right Hemisphere to synchronize product development and downstream PLM processes thereby accelerating time to market, increasing revenue, and reducing product lifecycle costs. Founded in 1997, Right Hemisphere is a privately-held, venture-funded corporation based in Silicon Valley and Auckland, New Zealand.
