

-Press Release -For Immediate Release –

- Right Hemisphere Releases The Mocap Data Module for Deep Exploration -

- Provides Automated Conversion of Motion Capture Data -

April 29, 2003, Los Angeles CA, USA

Right Hemisphere®, a leading provider of visual solutions software, announced today the immediate availability of the Mocap Data module for Deep Exploration, a powerful solution for the visualization and conversion of motion capture data. The Mocap Data module lets users view, create, translate and save motion capture files in mainstream motion capture formats, including Discreet Character Studio BVH and CSM formats.

"Mocap Data makes what was previously slow and tedious very quick and easy. It fits in perfectly with our daily workflow and requirements, I highly recommend it to anyone who deals with motion capture data." Ben Crowe, Studio Manager, [Madcap Studios](#).

The Mocap Data Module allows users to maximize Character Studio's advance motion capture system, by giving them the freedom to convert between C3D, TRB, TRC, HTR and Character Studio's unique BVH and CSM formats. It allows motion capture files to be browsed quickly saving the cleanup artist much of the trial and error of loading them, and giving greater ability to manage multiple files.

Both the Mocap Data and Deep Exploration are available for demonstration download from www.righthemisphere.com/downloads.htm. The demonstration may be licensed or full versions purchased from Right Hemisphere, sales@righthemisphere.com or through the company's distribution channel www.righthemisphere.com/store/#reseller.

About Right Hemisphere

Right Hemisphere www.righthemisphere.com is a leader in graphical information management, offering visual communication solutions that help companies unlock and leverage their complex 2D, 3D and CAD data across the entire enterprise.

Right Hemisphere has built a strong reputation for enhancing creativity, improving quality, increasing productivity and lowering costs in a variety of industries including film, games, CAD, manufacturing and industrial design.

Right Hemisphere's Deep Server enterprise solutions enable non-technical users the ability to search, access, manipulate and integrate complex graphical data into any mission-critical business or office application.

Other award-winning software includes Deep Exploration, a 2D|3D graphics file management and conversion utility, Deep Paint 3D for 3D painting and texturing and Deep UV for advanced UV mapping.

The privately funded company's corporate headquarters in Burbank, CA, with other offices in the Silicon Valley, Texas and an international office in Auckland, New Zealand. Right Hemisphere, a Microsoft-certified partner, can be contacted at 818-557-0003 (phone).
